WARNING

You are about to buy a product that is not simple and may be difficult to understand.

WHAT THIS PRODUCT IS ABOUT

❖ TYPE

The product is an Undertaking for Collective Investment in Transferable Securities (UCITS) constituted in the form of a Fonds Commun de Placement ("FCP") under French law, and which falls under the European Directive 2009/65/EC (UCITS IV).

❖ DURATION

The duration of the product is 99 years from its incorporation. The Management Company has the right to dissolve the product unilaterally. The product may also be dissolved in the event of a merger, total redemption of units or when the net assets of the product fall below the regulatory minimum.

❖ OBJECTIVES

The product aims to achieve, over a minimum recommended investment period of three years, a performance superior to that of its benchmark index Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged (EUR), by implementing a dynamic discretionary management strategy primarily based on the global bond markets through direct investments or synthetic exposures using derivative instruments.

The product's performance can be retrospectively compared to the benchmark index Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged (EUR) (Bloomberg code LGCPTRHEH), hedged against currency risk relative to Euro, with reinvested coupons. This index represents the performance of investment-grade (high credit quality) corporate debt securities in the global fixed-rate markets and is available on the Bloomberg website: <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices>.

The fund's investment process includes the following steps:

- The manager determines the fund's target allocations across the main segments of the global bond markets, based on a quantitative analysis of the fundamentals of these segments as well as a discretionary analysis of the macroeconomic and financial context, supported by a set of quantitative indicators;
- The manager then implements this overall allocation, either in direct bond positions or using index replication techniques via derivative instruments;
- The manager may also engage in overlay strategies, using options and futures, aimed at reducing risks or generating positive performance.

The net assets of the product may be exposed to:

- Up to 100% in money market and bond instruments issued by public or private entities, with a maximum of 50% of the net assets in unrated securities or those rated as speculative grade (rating below BBB- or Baa3 according to official rating agency scales or deemed equivalent by the management company, which does not exclusively or mechanically rely on credit ratings issued by agencies);
- Up to 50% in convertible or exchangeable bonds without rating constraints, issued by public or private entities;
- A minimum of 50% of its net assets in government bonds and/or private bonds;
- Up to 10% in contingent convertible bonds ("CoCos").

The allocation is made without geographical, sectoral, or size predominance among the main global markets.

Derivative instruments and those incorporating derivatives may be used to create synthetic exposure to a segment of the bond market or to increase the portfolio's exposure to currency, interest rate, credit, and equity risks, in line with the fund's management objective and without intending to generate overexposure to the markets. Derivatives can also be used for hedging purposes.

The average sensitivity range to interest rates is between 0 and +8. The average sensitivity range to credit risk is between 0 and +4. The fund's equity exposure can range from 0% to 30% of net assets, except for hedging operations which can lead to negative exposure. The fund's currency risk exposure will be limited to 20% of net assets.

Finally, the FCP (Mutual Fund) may engage in temporary acquisition or disposal of securities to optimize its cash holdings.

For this share class, the distributable amounts are fully capitalised. Subscription/redemption requests are centralized every business day at 11 am with Société Générale (32 rue du Champ de Tir, 44000 Nantes, +33 (0)2 51 85 57 09) and executed at the net asset value of the day.

❖ TARGETED RETAIL INVESTORS

WHAT ARE THE RISKS AND WHAT'S IN IT FOR ME

Risk indicator :

The risk indicator assumes that you keep the product for at least 3 years. The actual risk may be very different if you opt for an early exit, and you may get less in return.

We have classified this product in the risk indicator 3 out of 7 risk indicator, which is a low to medium risk class, due to its investment in bond assets. The main risks to which the product is exposed are credit, interest rate and volatility risks. Risks related to the low liquidity of certain securities, to forward financial instruments and to counterparty risks are not taken into account in the calculation of the risk indicator.

As this product does not provide market protection, you may lose all or part of your investment.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but not necessarily all the fees payable to your adviser or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you get out of this product depends on future market performance. Future market movements are random and cannot be predicted with any accuracy.

The unfavourable, intermediate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product, possibly supplemented by that of the benchmark, over the last ten years. Markets may develop very differently in the future.

The stress scenario shows what you might get in extreme market situations.

Recommended holding period : Example of an investment :		3 years EUR 10,000	
		If you leave after 1 year (if applicable)	If you leave after the recommended detention period
Scenarios			
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.

Adverse, intermediate and favourable scenarios: This type of scenario occurred for an investment in the investment universe of the Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged (EUR) between the years 2012 and 2022.

WHAT HAPPENS IF ELLIPSIS ASSET MANAGEMENT IS UNABLE TO MAKE PAYMENTS?

The product is a co-ownership of financial instruments and deposits separate from the asset management company. In case of default of the asset management company, the assets of the product held by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the custodian from those of the product.

WHAT WILL THIS INVESTMENT COST ME?

You may be asked to pay additional costs by the person selling or advising you on the product. If so, they will tell you about these costs and show you how all the costs affect your investment.

❖ COSTS OVER TIME

The table below shows the amounts taken from your investment to cover the different types of costs. These amounts depend on the amount you invest, the length of time you hold the product and the performance of the product (if any). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed :

- that in the first year you would get back the amount you invested (0% annual return);
- 10,000 EUR is invested.

	If you leave after 1 year (if applicable)	If you leave after the recommended detention period
Total costs	EUR 90	EUR 288
Annual cost impact (*)	0,9%	0,9%

(*) It shows the extent to which costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 2,77% before deducting costs and 1,85% after deducting costs.

We may share the cost with the person selling you the product to cover the services they provide.

HOW LONG DO I HAVE TO KEEP IT AND CAN I WITHDRAW MONEY EARLY?

Recommended holding period	3 years
-----------------------------------	---------

The recommended holding period has been chosen to provide a constant return that is less dependent on market fluctuations.

This product may not be suitable for investors who plan to withdraw their contribution before 3 years.

You can redeem all or part of your units at any time free of charge, however, it is more likely that the management objective of the product will not be achieved if you exit before the end of the recommended holding period and you may get less in return.

HOW CAN I MAKE A CLAIM?

In the event that a natural or legal person wishes to file a complaint with the product in order to have a right recognised or to repair a loss, the complainant must send a written request containing a description of the problem and the details giving rise to the complaint, either by e-mail or by post, in an official language of their country of origin to the following address
